Summary

A motivated and ambitious data analyst with a strong desire to learn. Previously served as an Operations Manager in a logistics company for over 5 years, overseeing the efficient flow of goods from origin to consumption. Demonstrated success in driving cost savings, optimizing processes, and enhancing operational efficiency.

Experience

K.M. Trans Logistics PVT. LTD.

Assistant Manager – Operations

Jaipur, RJ Aug. 2020 - Present

- **Fleet Tracking and Safety Monitoring:** Established a department using GPS, Fastags, and advanced tools for fleet management. Created Tableau dashboards for real-time performance and safety metrics.
- **Route Planning and Load Optimization:** Utilized advanced tools for efficient route sequencing and load planning. Developed Excel models and SQL queries to analyse and visualize data, enhancing operational efficiency.
- **Automated Fleet Document Management:** Automated processes with Power Automate for a database of over 2,300 vehicles. Maintained data accuracy using SQL and created compliance dashboards in Tableau.

Rhenus Logistics

Management trainee – Operations

Mumbai, MH July 2019 – March 2020

- **Developed and implemented a streamlined TMS system:** Managed a SQL database to store unique branch codes and lorry challan numbers, preventing duplication and simplifying shipment origin identification.
- **Calculated comprehensive movement costs:** Assessed all factors, including diesel rates and toll charges, to respond to RFQs for both domestic and import/export movements all done using a simple tableau dashboard.
- **Optimized truck selection and ensured documentation compliance:** Evaluated cargo factors to choose cost-effective timely deliveries. Coordinated documentation for seamless loading, unloading, and transit.
